ON-BOARD SWEEPERS

BS 750.1000

G2M
CONCEPT 

OPTIMUM SWEEPING

The sweeping giros deflect the nuts away from the wheels during the shaking stage to avoid crushing them. They are made up of 4 giros, 2 at the front which follow the wheels or not when turning. And 2 other giros in front of the rear wheels. Mounted on a parallelogram and relieved by a spring, they provide optimum ground tracking.

FRONT GIROS

CENTRAL GIROS

WORKING POSITION

ROAD POSITION

Giro diameter: 750mm
(1000mm optional)

Adjustable spring
suspension

Driven by hydraulic motor and lift
operated by cylinders
