

# RH 90

**RECEPTION HOPPER**  
**RH.90**

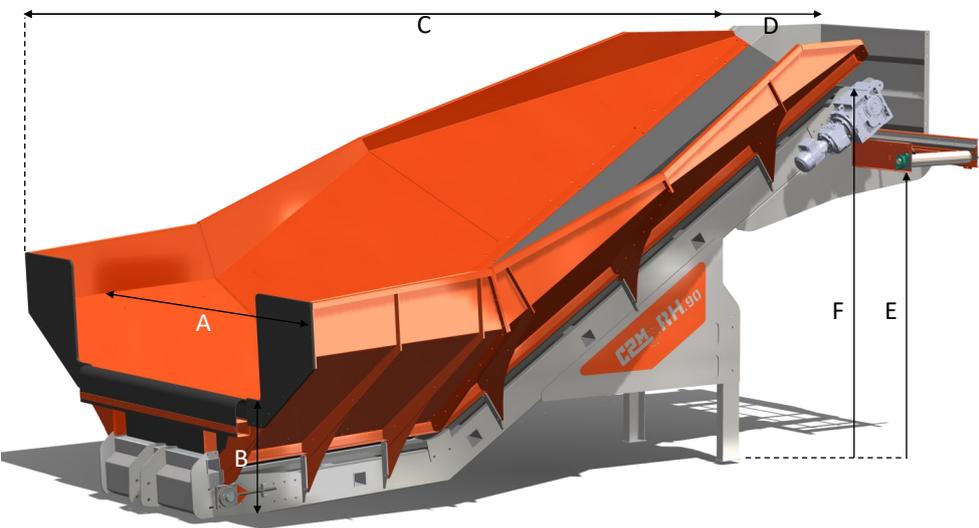

# 2 IN 1 RECEPTION HOPPER

Our receiving hopper offers a capacity of 6m<sup>3</sup> while maintaining a compact size. Its emptying height of only 600mm allows it to empty small trailers without adding ramps.

Economical, it can also offer a 2-in-1 solution with the addition of a roller delimeter on the cross conveyor belt or a nested star delimeter.

It is equipped with optional wheels for ease of movement with two adjustable legs to stabilise the hopper once in place.

## DIMENSIONS

<b>A</b> : Internal width of the hopper	3 000mm
<b>B</b> : Min. emptying height trailer	600mm
<b>C</b> : Total length without cross conveyor belt	4 750mm
<b>D</b> : Total length with cross conveyor belt	5 275mm
<b>E</b> : Outlet height with cross conveyor belt	1 715mm
<b>F</b> : Exit height without cross conveyor belt	1 960mm
